Eduroam service

Using the eduroam service you can connect to eduroam network partners’ wireless internet solution whether you are in Hungary or anywhere abroad. You need to use a valid username and password of the Corvinus University of Budapest.

If your education institution has implemented the eduroam service you may access the CUB infrastructure using your personal credentials.

Getting started

Thanks to eduroam, users of the higher education institutions participating in the service can transparently roam between the institutions and automatically use the host institution’s infrastructure without any further configuration.

In practice, this means that once you have set up your eduroam access credentials on your laptop, tablet or phone, you can access the host institution’s wireless internet service anywhere in the world without further setup.

The service is automatically accessible and activated for all university citizens. See the link below for a detailed description of eduroam.

https://kifu.gov.hu/ (Hungarian website)
https://www.eduroam.org/

Usage as university citizen

1. Choose a network of the partner institution’s wireless networks called eduroam (SSID: eudroam)
2. Enter your username in the following format: <cusman>@uni-corvinus.hu
3. Enter your CUSMAN password

Please note that if you use another institution’s Wi-Fi service, you will be required to comply not only with the Corvinus University of Budapest, but also with the host institution's terms of use.

Usage as a guest

1. Connect to the wireless network called eduroam
2. Enter your username and password, which will be provided by your home institution. Generic username format for a Hungarian institution <username> @ <your institution domain>

Please note that in addition to your home institution’s policies, you must also comply with the CUB Wireless Internet Usage Policy when using your CUB infrastructure.

Support
The home institution will always be able to help you with any problems you may encounter while using the eduroam service.

This means that if you are a CUB citizen, your Eduroam issues will be addressed by the User Support Department of the CUB IT Service Center.

The sending institution provides IT support to citizens of other institutions.

**Technical details**

SSID: eduroam
Certification provider: TERENA SSL
Accepted authentication protocols: EAP-PEAP and EAP-TLS using MS-CHAPv2
