Connecting to Cornet EAP WiFi network under Android 2.3.4 phone

1. In the settings choose the ‘Wireless and network’ menu item.

2. In the ‘Wireless and network’ click the ‘Wi-Fi settings’ option.

3. Turn on the phone’s built-in Wi-Fi device.
4. Among the appearing networks choose the Cornet-EAP SSID.

5. In the new screen choose the followings:
   - EAP method: **PEAP**
   - Phase 2 authentication: **MSCHAPV2**
   - Scroll down (Do not click the Connect yet)

7. Fill the required fields and click to the ‘Connect’ button:
   - Identity: ‘**Cusman username**’
   - Password: ‘**Cusman password**’
