Further info about research:
- 2019 - 2019, Comparative analyzes of companies in terms of greenhouse gas emissions operating on the Hungarian CEP market
Form of participation: leader of the research team
Moneylender:

Colleague CV: Diófási-Kovács Orsolya

Further info about research: The purpose of the research is to analyze the efficiency and environmental sustainability performance of CEP providers operating in the Hungarian market in the light of greenhouse gas emission data through case studies. The research involved in-depth interviews, which included a description of the company's logistics structure, fleet, and related emission data, as well as other environmental measures taken by the companies. Corporate sustainability reports and official websites and publicly available data were also analyzed.

Expert consultancy activities

- 2011 -
, Environmental management, sustainability consulting for public and private organizations
