In addition to the knowledge of relevant regulations, economic impacts and trends, international requirements and European standards, the degree will enable professionals to acquire a high degree of proficiency in the use of sectoral economic specifications and tools, and to develop a systems approach, problem solving, decision making, a proactive and results-oriented approach, and the ability to perform managerial and professional tasks specific to the energy sector.

8. The areas of expertise relevant to the qualification and the credit values assigned to the main elements:

Fundamental theoretical subjects: 16 credits

Microeconomics of the energy sector, market structures in the energy sector, public regulation in the energy sector, national and EU sectoral law, competition law and tax law.

Methodological skills related to the profession: 12 credits

Methodological skills, accounting and controlling in the energy sector, investment analysis and financial analysis in the energy sector.

Energy management knowledge related to the profession: 22 credits

The economics of the electricity sector, the economics of the natural gas sector, the economics of renewable energy and district heating, sector-specific environmental regulation, the international and social context of the energy sectors, security of supply, demand-side management.

9. The credit value of thesis: 10 credits

10. Rigorosum

Rigorosum on the natural gas sector: Economics of the natural gas sector I - II. Rigorosum on the electricity sector: Economics of the electricity sector I - II. Rigorosum on state regulation: State regulation in the energy sector I. - II.

11. Degree thesis

The aim of the degree thesis is to demonstrate the student's knowledge and professional expertise in a topic of his/her own choice, in collecting scientific data related to the chosen topic, systematising, analysing and processing them, in discussing the chosen phenomenon or problem, in developing hypotheses, in solving problems, in analysing alternative hypotheses, in reasoning and refuting counter-arguments, and in expressing his/her thoughts, views, positions and statements in a coherent, consistent manner that is sophisticated in terms of language use.

12. Type of thesis

Research thesis

13. Requirements for issuing the final certificate

The University shall grant a final certificate to a student who

- fulfilled the study and examination requirements set out in the curriculum, and
- earned the required credits.

14. Conditions for being admitted to the final examination

The conditions of admitting a student to the final examination are:

- a) the award of the final certificate,
- b) the submission of the thesis by the deadline,
- c) the evaluation of the thesis with a grade other than fail,
- d) the registration for the final examination by the relevant deadline,
- e) the student does not have any payment obligation towards the University in the given programme,
- f) the student has accounted for all items belonging to the University (books borrowed, sports equipment, etc.).

Students who have not fulfilled any one of the provisions included in points a)-f) may not be admitted to the final examination.

15. Parts of the final examination

The final examination consists of the defence of the thesis.

16. Establishing the result of the final examination

The arithmetic average of the following two grades, calculated to two decimal places:

- a) The grade for the thesis awarded by the referee(s) on a five-grade scale, in the case of more than one referee, the average of the grades given by the referees rounded to two decimal places and
- b) the grade received for defending the thesis and for answering the questions related to the thesis, graded on a five-grade scale.

17. Components of diploma rating, method of calculation

The result of the diploma shall be constituted of the arithmetic average of the following items, rounded to two decimal places:

- a) the average of the grades received for the rigorosum, and
- b) the result (grade) of the final examination.

18. Criteria for issuing the diploma

The precondition of issuing the diploma certifying the completion of studies in higher education is a successful final examination.

SLENSP22ABP, SLENSK22ABP - Energy Market Specialist / Energy Market Economist postgraduate specialisation programme in Budapest, in English, part-time training Curriculum for 2025/2026. (1.) fall semester for beginning students
