- (12)²¹⁶ At the end of the academic year, by 15 July at the latest, for the purposes of reclassification between programmes funded through state scholarship and self-funded programmes, Study Administration Services shall compile the academic ranking of students funded through a state scholarship who completed the semester until 5 July at the latest, based on their weighted average academic performance (rounded to two decimal places). The ranking should be formed by grouping together students who started their studies in the same study programme in the same semester and in the same form of funding.
- (13) The academic ranking shall feature all students funded through state scholarship, irrespective of how many credits they completed or whether their student status ceased during the year.
- (14) When calculating the weighted average academic performance of a student, the first two semesters after his/her initial enrolment shall be taken into account, even if he/she took a passive semester within one (1) year of enrolment. In such cases the cumulative adjusted credit index shall be calculated on the basis of the credits completed in the single completed semester. An exception shall be made for suspension of the student status for reasons specified in the Nftv (childbirth, long-term hospital treatment, illness). Afterwards during the student's further studies at the end of each academic year, the performance in the last two (2) active semesters shall be taken into account when calculating the weighted average academic performance.
- (15) Students who do not obtain a final certificate (diploma) in the sixth (6th) active semester of their bachelor-level studies or in the fourth (4th) active semester of their master-level studies shall be treated separately from other students who started their studies in the same semester.
- (16) The decision shall be uniform for students with the same weighted average academic performance.
- (17) The decision on reclassification between the categories of programmes funded through state scholarship and self-funded programmes shall be taken once in each academic year by 31 July.
- (18)²¹⁷ The decision on reclassification shall be taken by the dean responsible for the relevant programme portfolio.
- (19) The decision shall be communicated to the student in the form of a Neptun resolution.
- (20) The resolution on the reclassification of the student's form of funding shall specify the maximum number of funded semesters available to the student following reclassification. For this purpose, the period of funding available to the student in accordance with Subsections (3)-(7) of Section 47 of the Nftv. shall be examined.

- (21) The funding period is that part of the period of studies during which the student pursues studies funded through a (partial) state scholarship. The funding period is maximised. In the case of a programme funded through (partial) state scholarship, the rules with regard to the funding period are set out in the Nftv.
- (22) A student with disability who is registered as a student with a disability at the University shall have the period of funding specified in Subsection (21) extended by the Disability Committee upon request by the period (semester) requested by the student, but by a maximum of four (4) semesters. This benefit may be used for the acquisition of several degrees (diplomas), it being understood that the total period of funding used in respect of this Subsection does not exceed four (4) semesters.
- (23) When signing in to the first semester following the reclassification, the student shall make a written declaration about accepting the conditions of the state scholarship. The declaration shall be attached to the Master data sheet.
- (24) A self-funded student whose previous semesters funded through state scholarship exceed the duration of the programme specified for the given study programme in the programme and outcome requirements by two, for students with disabilities by six semesters, may not be reclassified to a programme funded through state scholarship.
- (25) ²¹⁸ The University shall determine the number of state-funded semesters and/or semesters funded through (partial) Hungarian state scholarship used by the student on the basis of the available data and, if required by law, shall decide on changing the form of funding within fifteen (15) days of the determination. The decision is made by the dean responsible for the relevant programme portfolio. The decision shall be communicated in the form of a Neptun resolution. Once the decision has become final, Study Administration Services will immediately change the student's form of funding in Neptun.
- (26) In the case referred to in Subsection (25), the decision shall be taken every six months after the end of the academic term, but not later than 15 March following the autumn semester and 15 October following the spring semester.
- (27) Students who were not reclassified shall continue their studies in the same as before in the next academic year.
- (28) Students funded through a state scholarship whose exchange programme did not take place in an EEA member state shall be conditionally reclassified to a self-funded programme at the time of reclassification. If the student completed the subjects, he/she shall present the relevant subject acceptance request along with the supporting documents in accordance with the SER. Following the acceptance of the subject, the student shall be reinstated to the programme funded through state scholarship.

- c. The calls for proposals shall specify the period of activity which will be taken into account for the purposes of the evaluation.

2) Evaluating academic performance:

- a) For the purposes of evaluating academic performance
 - aa) either the scholarship average laid down in 72(6) of the SER should be applied,
 - (1) The scholarship average is calculated on the basis of the results of all the subjects taken during the active semester. The scholarship average is the product of the credit value and the grade of the subjects completed in the semester divided by the number of the credits taken. For the purposes of calculating the scholarship average, the grades achieved in the compulsory and compulsory elective subjects and their credit values shall be weighted by 1.2.

Regulation on Student Fees and Benefits

$$\text{Scholarship average} = \frac{\sum 1,2 \times \text{credit}^K \times \text{érdemjegy}^K + \sum \text{credit}^V \times \text{érdemjegy}^V}{\sum 1,2 \times \text{credit}^K + \sum \text{credit}^V}$$

where

C: all compulsory, compulsory elective subjects and compulsory subjects in subspecialisations/specialisations according to the sample curriculum,

E: free elective subject not included in the sample curriculum;

(2) scholarship average of first-semester Master students: based on the "scholarship average" derived from the admission points (100/20=5)

ab) or the credit-weighted average academic performance as defined in 72 (2) of the SER shall be applied:

$$\text{Credit-weighted average academic performance} = \frac{\sum (\text{credit points} \times \text{grade})}{\text{earned credit points}}$$

ac) either the cumulative adjusted credit index laid down in 72(6) of the SER,

ad) or the scholarship index defined in point (eb) (1) a) of this section

b) The calculation of the scholarship average and the calculation of the credit-weighted average academic performance is based on the results of all the subjects taken and completed by the student in the semester(s) concerned.

ba) The grades obtained at another higher education institution within the framework of an additional (parallel) student status, during a parallel programme within the institution or during previous studies may not be included in the scholarship average and the credit-weighted average academic performance.

bb) The subjects closed with an insufficient grade or with a 'exam not taken', 'not completed', 'absent' or "denied" entry are included in the numerator of the formula with a zero grade, an exception to this is if the student does not appear at the retake examination for the improvement of the grade of a successful exam in a given subject and receives an 'exam not taken' entry, in which case the given subject is included in the numerator with the last successful grade and credit value.

bc) For students participating in a Master programme, the subjects to be completed simultaneously with the programme aimed at obtaining the Master degree - and representing credits in addition to the credits required for obtaining the diploma - as stipulated on a compulsory basis during the higher education admission procedure in the framework of the preliminary credit recognition procedure after taking into account the credits completed during previous studies, shall not be included in the scholarship average, and the credit-weighted average academic performance.

bd) Subjects completed under a guest student status, regardless of whether the student completed them in the framework of a guest student status at a domestic or foreign higher education institution, shall be considered as having been completed by the student at the University and shall be included in the calculation of the scholarship average and the credit-weighted average academic performance with the credit values and grades approved by the competent Credit Transfer Committee.

Regulation on Student Fees and Benefits		

- be) The grades of subjects completed at another higher educational institution under an additional (parallel) student status or in the framework of simultaneous programmes within the institution shall only be taken into account if the student completed them in the semester for which the indicators are calculated, and if they are accredited by the relevant credit transfer committee for that semester.
- c) The scholarship average must be used
- ca) For the National Higher Education Scholarship,
 - cb) For Study Abroad Scholarship
 - cc) For the Corvinus Excellence Scholarship
- d) The credit-weighted average academic performance should be used
- da) for Hungarian state scholarships (end-of-year reclassification),
 - db) For the Corvinus scholarship (at the time of the review).
- e) Ranking criteria used to calculate the amount of study scholarships:
- ea) For a student who established his/her student status before the 1st (autumn) semester of the 2019/2020 academic year in the programme
 - a. the median of the scholarship average per study programme for students eligible for the scholarship (those who have completed at least 23 credits and reached a scholarship average of 3.00). The median value must rounded to two decimal places
 - b. Only a student whose scholarship average exceeds the median value calculated for his/her study programme can receive a scholarship.
 - c. In the case of study programmes where the small number of students eligible for a scholarship and their identical scholarship average do not allow for differentiation, applicants may be awarded a scholarship if their scholarship average is equal to or higher than the minimum scholarship average of the students who were awarded a scholarship in the previous evaluation period.
 - eb) For a student who established his/her student status in or after the 1st (autumn) semester of the 2019/2020 academic year in the programme, the amount of the study scholarship shall be defined as follows:
 - (1) For students eligible to apply for scholarship, scholarships will be awarded to applicants based on the ranking according to the scholarship index as follows:
 - (a) Based on the sum of the scholarship average achieved in the last active semester and the credits of the completed subjects to be taken into account for the calculation of the scholarship average, a scholarship index is calculated for the evaluation of academic performance according to the following formula (With the exception of first-year students starting their master programme of a two-cycle programme in a given semester):

 CORVINUS UNIVERSITY of BUDAPEST	STUDENT REQUIREMENTS PART4	Version number: 04 File number: JB-SZ/7/2025
Regulation on Student Fees and Benefits		

Scholarship index = Scholarship average + ((credit value of completed subjects that may be taken into account for the calculation of the scholarship average /27) - 1)/2)

it being understood that students who have completed more than 42 credits in the subjects that may be taken into account for the calculation of the scholarship average shall be counted as 42 credits in the calculation of the scholarship index.

- (b) As a general rule, students are ranked by programme and year as follows:
- (i) Students studying in the same language of instruction in the same study programme are classified as belonging to the same programme (the place of delivery and method of organising the classes are not taken into account).
 - (ii) Except for first-year students starting their master programme of a two-cycle programme in a given semester, who form a group, and for students on a study abroad.
 - (iii) The number of active semesters including the semester in which the assessment is made is taken as the basis for classification under a given year: 1-2 active semesters: Year I, 3-4 active semesters: Year II, 5-6 active semesters: Year III, 7-8 semesters: Year IV, 9-10 semesters: Year V.
 - (iv) Students who have completed the programme duration specified in the Programme and Outcome Requirements of the study programme, but are within the time limits of the study period plus one (1) semester in bachelor programmes and the study period plus two (2) semesters in a master programme of a two-cycle programme shall be ranked under the highest year of the study programme.
 - (v) Students from cohorts with few students (less than 10 students) are ranked together with the neighbouring cohorts; in the case of two neighbouring cohorts, the lower cohorts are grouped together until the 10 students are reached.
 - (vi) In the case of programmes where, even after mergers, the low number of students and the same academic performance make it impossible to rank the applicants, applicants may be awarded a scholarship based on the most ideal grouping and distribution.
 - (vii) Students who have switched for another study programme/programme after the semester for which the scholarship is established must be placed in the programme relevant for the semester on the basis of which the scholarship was established as a result of ranking (the previous active semester).
 - (viii) Students will be ranked within their programme and cohort from the ones with the highest to the ones with the lowest scholarship index, until the proportion of scholarship holders in a given year of the programme reaches 20% of the number of applicants eligible for scholarship.
- (2) The amount of the scholarship corresponding to the achieved academic performance is determined for each course in such a way that

Regulation on Student Fees and Benefits

- (a) the scholarship indices are transformed into a scale of 0 to 100 based on the grouping defined as a rule of thumb, with the lowest scholarship index for the lowest scholarship category being counted as 0, the highest scholarship index for the highest category being counted as 100, and the intermediate scholarship indices being rounded to a whole number on the scale:

$$K_{\text{öDI}} = ((\text{Hallg}_{\text{öDI}} - \text{Min}_{\text{öDI}}) / (\text{Max}_{\text{öDI}} - \text{Min}_{\text{öDI}})) \times 100$$

where

$K_{\text{öDI}}$ - transformed to a scale of 0-100, of the scholarship indexes of the scholarship recipients based on the grouping defined as the general rule rounded to the nearest whole number,

$\text{Hallg}_{\text{öDI}}$ - The scholarship index of a student eligible for a given scholarship, based on the grouping defined as the general rule,

$\text{Min}_{\text{öDI}}$ - The lowest of the scholarship indices for students eligible for a scholarship, based on the grouping defined as the general rule,

$\text{Max}_{\text{öDI}}$ - The highest of the scholarship indices for students eligible for a scholarship, based on the grouping defined as the general rule,

- (b) the amount of scholarships corresponding to each scale value may be determined as either linear or non-linear distribution, provided that no scholarship of a lower amount may be awarded for a higher scale value within a given training programme,
- (c) monthly grant amounts are rounded to HUF 100 according to the general rules of rounding.

- d) For the calculation of income, the average of the three months specified in the relevant call for applications is taken into account for income that can be measured regularly on a monthly basis, and one-twelfth of the last year for which a tax declaration has been submitted is taken into account.
- e) If the student does not require the income figures to be included in the application for a regular social needs-based grant, he/she does not need to provide proof of income.
- f) Assessment and amount of the dormitory grant based on social needs:

Social point	The amount of the dormitory grant based on social needs
above 60 points	77% of the total dormitory fee under the RSFB
59-30	39% of the total dormitory fee under the RSFB
29-0	no grant

In the framework of the dormitory dormitory grant based on social needs, the University will set a reduced dormitory fee for students who have been admitted to a dormitory, including students who have been admitted to a college for advanced studies and are in need of a dormitory place. The rate of the discount is shown in the table above. The discounted fee is based on the student's social score established on the basis of his/her application for a regular grant based on social needs submitted for the given semester, by comparing the score with the percentage discount in the table above.

Regulation on Student Fees and Benefits		

The calculation of the average academic performance and completed credits for Corvinus Scholarship students admitted from the 2020/2021 academic year is based on the results of all the subjects taken by the student in the semesters concerned, in view of the following.

- (1) The grades and credit value obtained at another higher education institution within the framework of an additional (parallel) student status, during a simultaneous programme within the institution or during previous studies may not be included in the academic performance and the completed number of credits.
- (2) The subjects closed with a fail grade or with a 'exam not taken', 'not completed', 'absent' entry are included in the numerator of the formula with a zero grade, an exception to this is if the student does not appear at the retake examination for the improvement of the grade of a successful exam in a given subject and receives an 'absent' entry, in which case the given subject is included in the numerator with the last successful grade and credit value.
- (3) For students participating in master programme, the subjects to be completed simultaneously with the programme aimed at obtaining the master degree - and representing credits in addition to the credits required for obtaining the diploma - as stipulated on a compulsory basis during the higher education admission procedure in the framework of the preliminary credit recognition procedure after taking into account the credits completed during previous studies, shall not be included in the number of credits completed.
- (4) Subjects completed under a guest student status, regardless of whether the student completed them in the framework of a guest student status at a domestic or foreign higher education institution, shall be considered as having been completed by the student at the University and shall be included in the average academic performance and the number of credits completed with the credit values and grades approved by the Credit Transfer Committee.

- f) **Access card replacement fee:** fee for replacing the proxy card used for access to the dormitory (in case of damage or abandonment)
- g) **Key Replacement fee:** fee for replacing the key used for the dormitory room or special room (in case of damage or loss)
- h) **DEPOSIT:** in connection with the establishment of the student's dormitory status (except where there is a guarantee from the student's institution behind the payment of the student fees), the student pays a deposit (security) before moving into the dormitory. The Dormitory may use all or part of this amount if the student causes damage to Corvinus University in connection with the move-in, accommodation, stay (including services and events provided there) or fails to fulfil other payment or administrative obligations in connection with the stay in the dormitory in due time. At the end of the stay or for any other reason, the Dormitory will settle the amount of the deposit with the dormitory resident. The deposit will be returned in full if the student, personally or by proxy, has fulfilled the administrative obligations of moving out as set out in the Dormitory Rules by the last day of the stay (signed move-out declaration and submitted the move-out request in Neptun), has not caused any damage, has settled all debts, has returned the room in a tidy and cleaned condition and has removed all personal belongings from the residence hall. Failure to comply with any of the above conditions will result in forfeiture of the deposit. Once the obligations have been fully met, the settlement with the student will take place within a maximum of 45 days.
- i) **Renunciation fee:** The cancellation fee is the same as the deposit. A cancellation fee will be charged if a student who has applied for a dormitory place cancels his/her application after the deadline specified in the dormitory application, withdraws from the dormitory application or does not move in by the last day of the university registration period. If, for any reason, the applicant's student status is not established, the cancellation fee previously established will be cancelled.
- j) **Failure to move out fee:**

A fee equal to the amount of the deposit will be charged when the student fails to fulfil his/her administrative obligations to move out, i.e. fails to fulfil his/her administrative or other obligations by the last day of his/her stay in the dormitory.

Room/bathroom users will be charged a fee for the forced cleaning of their rooms/bathrooms.
- l) **Gym fee:** the student can request the use of the gym in the dormitory. On the basis of the application submitted, the student is liable to pay fees for the semester in question. Unless the student withdraws the request by the deadline set and announced by the Head of Dormitory.

Annex 7 ²²⁹

1. Admission procedure and evaluation of applications for placement in a dormitory

Students staying in colleges for advanced studies are not covered by these procedures. On the basis of the applications submitted in the course of their admission procedure, the colleges for advanced studies shall decide at their own discretion on the criteria of dormitory placement and the rules of assessment, during which they may apply special conditions. The University may use unused places available to the colleges for advanced studies for the purposes of general dormitory placement.

The places in the University's dormitories are intended to provide accommodation to students during the study and exam period according to the calendar of the academic year, as well as beyond this period for the duration of the fulfilment of the academic requirements (e.g. practice period) set out in the programme and outcome requirements and the curriculum, as specified in the present Regulation.

The procedures for the publication of applications for dormitory placement, the submission of applications and the criteria for the evaluation of applications are determined by the Head of Campus Services, subject to the provisions of the Grants Decree, within the following framework:

The University will use an early application procedure to offer places in the dormitories to the following groups of students: Students participating in the Stipendium Hungaricum and Diaspora scholarship programmes, foreign language preparation courses and guest students. They will be given priority for accommodation in dormitories within the quota set for the programme, provided they meet the conditions.

The University announces a general admission procedure twice per academic year (for the full academic year or for the spring semester).

In addition to the general admission procedure, the University launches a supplementary call for applications for dormitory accommodation (the supplementary application may be continuous, depending on the call for applications), to the extent that there are places available.

The calls for application are announced by the Head of Campus Services in consultation with the Student Social Committee and the Head of Study Administration Services.

The call for applications must be published on Neptun and on the university website.

The call for applications must be in line with the provisions of the Vice-Rector for Student Affairs on defining the social situation of students.

Applications for dormitory accommodation are subject to a general application procedure:

- Hungarian nationals who have been admitted to full-time (daytime delivery) bachelor, master or programme at the University, as well as who are studying in such programmes, persons who qualify as Hungarians living beyond the borders of Hungary according to the

²²⁹ Amended by: Resolution No. 39/2024 (12.19.) of the Board of Trustees. Effective date: 20. December 2024

applicable legislation, and foreign students studying under an interstate agreement. (Students studying under the Stipendium Hungaricum, Stipendium Hungaricum Sport and Diaspora scholarship programmes, as well as students participating in the preparatory foreign language course and guest students are eligible to apply through the early admission procedure set out in this Annex.)

- Also, non-Hungarian students, students who are not Hungarians living beyond the borders of Hungary and foreign students who do not study under an interstate contract, but who have been admitted to or who study in a full-time (daytime delivery) bachelor, master, doctoral programme may apply, it being understood that dormitory accommodation is only available to them if the conditions are met, even if there is still a place available after the application of the students listed in the previous subsection.
- Part-time students (correspondence, evening delivery mode) and students taking part in a specialist postgraduate programme may apply for a place in a dormitory only after the early application procedure and the general application procedure have been completed, in the framework of a clearing process, subject to the availability of places and the payment of the full dormitory charge.

The general rules apply to the evaluation of applications of students participating as assessors in the application procedure for dormitories and in that for the regular grant based on social needs for the given dormitory, it being understood that the student concerned may not evaluate his/her own application.

Any person who has any outstanding debts to the University or whose residence agreement has been terminated by the University is not eligible to apply for dormitory accommodation.

During the dormitory application procedure prior to the academic year, the University can provide dormitory placement for 5 or 10 months. During the mid-semester dormitory application procedure, it can be provided for 5 months until the end of the given academic year, provided that the successful applicant continuously meets the conditions of the residency contract.

The dormitory admission score is the sum of the applicant's study score, professional score, public affairs score and social needs-based score (except: foreign students). For the purposes of applications for dormitory admission, the score obtained in the application for regular grants based on social needs is taken into account, corrected to the nearest integer according to the rules of mathematical rounding. If the applicant does not apply for a regular grant based on social needs, the University cannot calculate a social score for the applicant, so the applicant's social score is zero.

The Head of Campus Services is responsible for the processing, scoring and aggregation of applications, it being understood that the responsibility for determining the result of the dormitory admission procedure (dormitory admission score) rests with the head of the respective dormitory building, the SSC and SAS.

The assessment requirements are set out in this Annex.

The decision on dormitory placement is made by the Head of Campus Services, who will set out his/her decision in a resolution.

 CORVINUS UNIVERSITY of BUDAPEST	STUDENT REQUIREMENTS PART4	Version number: 04 File number: JB-SZ/7/2025
Regulation on Student Fees and Benefits		

The Head of Campus Services informs students of the decision before the resolutions are communicated, and they can comment on the results. Comments may be submitted in the manner and by the deadline specified in the call for applications. The Head of Campus Services shall evaluate the comments.

The resolution shall be communicated to the applicant by Study Administration Services via Neptun after the commenting procedure has been completed.

The resolution is subject to legal remedy under the general rules.

The dormitory status is established on the basis of a final positive resolution regarding the dormitory admission procedure by the submission of the Move-In Request in Neptun and the simultaneous acceptance of the residence contract between the University and the student.

After the end of the general admission procedure, if there are vacant places in the dormitories, the Head of Campus Services will decide on the conditions and the method of filling the places in the framework of the admission procedure. The Head of Campus Services shall also be responsible for taking a decision on using accommodation capacities outside the admission procedure.

The rules on termination of dormitory status during the academic year are set out in the call for applications and in the General Terms and Conditions of the student residence agreement (in short: GTT).

2. The rules of evaluation of applications for dormitory admission

(for Hungarian and cross-border Hungarian²³⁰ students)

- (1) Evaluation criteria for the assessment of dormitory applications submitted in the Neptun Unified Education Administration System:
 - a) the number of points obtained under the application for regular grants based on social needs launched in parallel with the dormitory admission procedure,
 - b) distance of permanent residence from the administrative boundaries of Budapest,
 - c) the applicant's academic record (for first-year students, the admission score, and for upper-year applicants, the arithmetic average of the student's academic scholarship average for the last two completed semesters),
 - d) the applicant's contribution to the student community at the University and his/her scientific work,
 - e) preferential treatment of the applicant, if the conditions for preferential treatment set out in the Higher Education Act are met (on a case-by-case basis),
- (2) The same scoring system as set out for the regular social needs-based grant scheme specified under (1)a). For the purposes of applications for dormitory admission

²³⁰ Cross-border Hungarians are considered: Hungarians living in the territories annexed after the Treaty of Trianon (Austria, Slovakia, Ukraine, Romania, Serbia, Croatia, Slovenia).

examination, the score obtained in the application for regular grants based on social needs is taken into account, corrected according to the rules of mathematical rounding.

- (3) Breakdown of scores for the purposes of dormitory admission (250 points in total):
- a) 50 percent of the points obtained in the application for regular grants based on social needs (maximum 100 points),
 - b) 20 per cent of the average academic performance of upper-year students (maximum 40 points) or 20 per cent of the admission score of first-year bachelor and master students (maximum 50 points),
 - c) work for public and student organization activities 20% (maximum 30 points)
 - d) work for academic activities 12% (maximum 30 points)
 - e) results achieved for sports activities 8% (maximum 20 points)

points given for distance 8% (maximum 20 points)

The number of points that may be awarded based on distance of the place of residence is shown in the table below. Students with permanent residence beyond the borders of Hungary may be awarded + 1 point in addition to the points featured in the table.

Distance of place of residence	Score
Local (Budapest)	0 points
within 30 km	3 points
between 30 and 59 km	5 points
between 60 and 89 km	7 points
between 90 and 119 km	9 points
between 120 and 149 km	11 points
between 150 and 179 km	13 points
between 180 and 209 km	15 points
between 210 and 239 km	17 points
over 240 km	19 points

- (4) Dormitory places shall be filled and cut-off scores shall be established based on the ranking of the students who obtained the highest score in the application for admission to a dormitory and who indicated the given dormitory as their first choice. Deviation from this is only possible if the gender distribution according to the room assignment does not allow it.
- (5) The social score for admission to a dormitory shall be determined on the basis of the social points achieved in the application for regular social needs-based grants as defined in the RSFB.
- (6) A maximum of one hundred (100) social points may be earned in the dormitory admission procedure. If the applicant does not apply for a regular social needs-based grant or the application is invalid, the social score shall be zero (0).

 CORVINUS UNIVERSITY of BUDAPEST	STUDENT REQUIREMENTS PART4	Version number: 04 File number: JB-SZ/7/2025
Regulation on Student Fees and Benefits		

- (7) During the dormitory admission procedure, the score established on the basis of the scoring system of the regular social needs-based grants shall be taken into account. In the event that this is more than one hundred (100) points, the student will still only receive one hundred (100) social points during the application for dormitory admission.

(8) The points available to applicants in the first year of their bachelor programme on the basis of their admission scores

The score obtained in the national higher education admission procedure is divided by ten, giving a maximum of fifty (50) points. (A maximum of five hundred (500) points is available in the national higher education admission procedure, i.e. $500/10 \Rightarrow 50$.)

(Corrected according to the rules of mathematical rounding.)

(9) Points available to applicants in the first year of their Master programme on the basis of their admission points (maximum 40 points)

The score of applicants for the first year of a Master programme under the national higher education admission procedure must be divided by 2.0, giving a maximum of fifty (50) points. (A maximum of one hundred (100) points is available in the national higher education admission procedure, i.e. $100/2.0 \Rightarrow 50$.)

(Corrected according to the rules of mathematical rounding.)

(10) Points available to applicants in upper years on the basis of their average academic performance (maximum 40 points)

The arithmetic average* of the academic scholarship average of the last two completed semesters of the upper year applicants' shall be multiplied by ten. The maximum number of points available is forty (40), i.e. $5.00 \times 10 \Rightarrow 50.0$ " (Corrected according to the rules of mathematical rounding.)

If the applicant participated in a partial study program abroad during the previous semester, and as a result their grades have not yet been entered into the Neptun system by the time of the dormitory application procedure, the arithmetic mean of the applicant's academic scholarship averages for the two active semesters preceding the semester abroad must be multiplied by ten and taken into consideration for the application.

* Average academic performance = academic scholarship average - calculated in accordance with the Regulation in Student Fees and Benefits in force, on the basis of the academic scholarship average for the last completed academic semesters featured in the Neptun system on the date set as the deadline for submission in the call for applications for admission to a dormitory.

(11) Scores for extracurricular activities (maximum 80 points)

1. General evaluation of public and student organization activities (maximum 30 points) - *taking into account the values in the table according to Annex 1, point 6), and for doctoral programs, according to Annex 1, points 8/b (evaluation ratio 30%)*

Regulation on Student Fees and Benefits

- a) Work in a maximum of two organizations can be considered.
- b) Points can only be awarded for one position within an organization.
- c) For point calculation, the student organization must be counted in the category it is accredited for in the current semester, provided the student is currently a member. If the student refers to a previous activity (no older than two semesters), the category the organization belonged to at the end of the student's active participation must be considered.
- d) Work in a student organization of another higher education institution cannot be evaluated.
- e) For first-year undergraduate students, proof of activities carried out in high school (e.g., Student Council work) is acceptable (maximum 5 points).

2. **Scientific activities** (maximum 30 points) - taking into account the values in the table according to Annex 1, point 3) (evaluation ratio 30%)

- a) If the student applies with a co-authored TDK paper or other scientific work, the following scoring applies:
 - a. If the paper has two authors, the applicant receives 70% of the maximum points available.
 - b. If the paper has more than two authors, the student can receive the value of the maximum points available divided by the number of authors.
- b) For scientific activities, work from the previous two active semesters can be evaluated. In the case of OTDK, the most recent competition is considered.
- c) For first-year undergraduate applicants, we take into account the competition results from the last two school years of their high school scientific activities in the following way (maximum 15 points):

Activity	Points Awarded	Required Proof
Reaching the OTVK finals	3 points	A certificate issued by the competition organizer about the placement and/or participation.
OTVK 1st-3rd place	7 points	A certificate issued by the competition organizer about the placement and/or participation.
National competition placement (1st-5th place)	3 points	A certificate issued by the competition organizer about the placement and/or participation. The

		certificate must state that the applicant participated in a national competition.
--	--	---

3. Sports activities (maximum 20 points) - taking into account the values in the table according to Annex 1, point 5) (evaluation ratio 10%)

For each application period, sports activities from a maximum of the previous four years can be considered.

3. Evaluation Procedure for Foreign Students

Dormitory applications for full-time non-Hungarian citizens (from within or outside the EEA) are submitted through the Neptun system. The process and deadlines follow those published in the dormitory application call(s), with the exception of fee-paying students starting their first semester who were admitted via the rolling institutional admission procedure. For these students, admission is continuous until the established quota is reached.

Criteria for evaluating applications:

- The primary sorting principle for incoming applications is the time of submission (first come, first served).
- However, first-year (bachelor's then master's), followed by PhD students, are given preference over upper-year students during evaluation.
- For upper-year students, the arithmetic mean of their academic scholarship averages* for the last two completed active semesters must be multiplied by ten. The ranking is then established based on this total score. In the case of a tie, the submission time is also considered.
- The number of available places for programs and fee-paying foreign students is predetermined. Admission is granted up to these quotas, taking into account the above evaluation criteria within each specific group.

The evaluation criteria are therefore independent of the points system automatically calculated by the Neptun system.

Students on partial study programs can submit applications for their reserved places within the framework of the early dormitory admission procedure (in early June and December).

4. Special Rules for Fee-Paying Foreign Students Starting Their First Semester (Admitted through Institutional Admission)

Minimum requirements for submitting a dormitory application for first-semester fee-paying foreign students admitted through the institutional admission procedure:

- Receiving an "accepted admission decision" for the upcoming academic year.
- Paying the tuition fee in Neptun.

 CORVINUS UNIVERSITY of BUDAPEST	STUDENT REQUIREMENTS PART4	Version number: 04 File number: JB-SZ/7/2025
Regulation on Student Fees and Benefits		

- Submitting the dormitory application in Neptun by the deadline specified in the notification letter (while acknowledging and accepting the conditions and regulations contained in the application).

The evaluation of incoming applications, provided the above conditions are met, follows the evaluation criteria outlined in point 7.3 of this appendix, up to the limit of the available places.

Conditions for issuing a proof of accommodation, upon winning a dormitory place:

- Submitting the dormitory move-in request, thereby establishing the dormitory legal relationship.
- Paying the dormitory fee for the first academic semester of the applied period.

Conditions for withdrawing a place:

- If the dormitory place is withdrawn before the start of the regular dormitory admission procedure (according to the deadlines in the current call, usually early August), 20% of the paid fee will be retained.
- If the withdrawal occurs after the announcement of the results of the regular dormitory admission procedure (late August), 50% of the paid fee will be retained.
