

Philosophy, Politics, Economy Bachelor's programme

training program

For students who start in the fall semester of 2026/2027

Philosophy, Politics, Economy Bachelor's programme

Valid: For students starting their studies in the 2026/2027/1 semester

General information:

Person responsible for the major: Zoltán Nicolás Dujisin-Muharay, Assistant Professor

Place of the training: Budapest

Training schedule: full-time

Language of the training: English

Specialisations:

1. Politics and Economics
2. Contexts of the Economic Policy and Globalisation Specialisation
3. Economics and Philosophy
4. Modern Political Problems
5. Politics and Philosophy
6. Modern Philosophy and Global Issues
7. A magyar politikai rendszer intézményei, szereplői, működése; Hungarian Political System
8. Global Social Challenges

Training and outcome requirements:

1. **Name of the Bachelor program in Hungarian:** filozófia, politika, gazdaság
Name of the Bachelor program in English: Philosophy, Politics, Economy
2. **The level of qualification to be acquired in the Bachelor study program and the specification of the professional qualification in the diploma:**
 - level of qualification: baccalaureus, bachelor (abbreviated: BA-) degree
 - professional qualification in Hungarian: gazdaság és politikai kapcsolatok szakember
 - English specification of the professional qualification: Expert in Political and Economy Studies
3. **Field of study:** social sciences
4. **Duration of the program in semesters:** 6 semesters
5. **Number of credits to be collected to acquire the BA degree:** 180 credits
 - orientation of the study program: theoretically oriented (60-70%)
 - credit value assigned to the preparation of the thesis: 10 credits
 - minimum credit value to be assigned to free elective subjects: 12 credits.
6. **Classification of the professional qualification according to the unified classification system of fields of study:** 311/0312
7. **The training purpose and professional competences:**

The purpose of the program is to train economic experts acquiring a knowledge of philosophy, political sciences and economics by combining the knowledge of social sciences and humanities. By providing the basic conceptual and theoretical knowledge, the program will enable students to take and gain an interdisciplinary approach and understanding of social, political and economic processes and the interrelationships between national and global challenges of such a nature and to continue their studies in a master program.

7.1. Professional competences to be acquired

7.1.1. Experts in political and economy studies can be described as follows in terms of their

a) knowledge

- Knowledge of the basic questions, concepts, classical authors and trends in philosophy.
- Knowledge of the origins and concepts of the social sciences.
- Understanding and overview of the relationship between politics and the economy, the basic theories of political sciences and economics and their methods of analysis.
- Awareness of the most relevant national and international social, political and economic issues.
- Ability to ask the fundamental questions of this interdisciplinary discipline.
- Knowledge of the academic and evaluation criteria for independent scientific work.

b) skills

- Ability to interpret political and economic processes and phenomena in a complex way, and to recognise their ethical aspects.
- Ability to identify social, economic and political problems, to interpret, compare and critically analyse possible answers.
- Ability to interpret the works of classical authors and contemporary thinkers.
- Ability to follow the findings of the discipline and to interpret, apply and exploit its theories and models independently.
- Ability to apply the methods, manage and interpret data required for their independent work.

c) attitude

- Receptiveness to interdisciplinarity and a sensitivity to innovative approaches.
- Theoretically demanding, methodologically conscious approach.
- Thoughtfulness, curiosity and sensitivity to social problems.
- Seeking broader correlations in the study of political, economic and social phenomena.
- Focusing on the essence while paying attention to details as well.
- Task-orientation and a high level of motivation in problem solving.
- Critical thinking.
- Conscious contemplation on their future career.
- Demonstration of a responsible, tolerant attitude, respecting the opinions of others.
- Commitment to enriching the discipline.
- Being up to date and striving at the constant updating of knowledge.
- Ability to work professionally and responsibly both individually and in a team

d) autonomy and responsibility

- Working independently and backing up their findings with professionally sound arguments.
- Representation of their views independently, by looking for, presenting and being open to alternatives.
- Acceptance of ethical and professional responsibility for their own work.
- Confidence in placing their own findings in the web of scientific ideas, trends and models.
- Autonomy in problem detection, analysis and thinking.
- Exercising such autonomy by respecting and abiding the ethical standards of science.
- Complex approach in line with interdisciplinary awareness.
- Responsible participation in research and development projects.
- Setting an example to peers and others working around.

8. The characteristics of the bachelor program**8.1. Professional characteristics****8.1.1. Branches of science leading to the professional qualification, fields of expertise comprising the study programme:**

- basic and general studies [philosophy (classical philosophy, civilisation and culture, ethics), political science (basic political concepts, comparative political science), economics (basics of economic thinking, behaviour of individuals and institutions, analytical frameworks, models), methodology (logic, research methodology, statistics, academic writing), other studies in social sciences (psychology, sociology)] 40-50 credits;
- philosophical, political and economic multi- and interdisciplinary professional studies 60-80 credits:
- economic and social history, history of political and economic ideas, political and economic sociology, political and economic psychology;
- political philosophy, political and economic ethics, analytical philosophy, value theory, aesthetics, philosophy of science;
- political organisations and models; local and central government; political communication; international politics, geopolitics, security policy; public policy, state and public administration; European integration, globalisation and regionalism;
- community economics, community decision theory; international economics, development economics; economic systems, institutions and economic policy; experimental and behavioural economics; economic and policy applications of game theory; international finance and financial systems; innovation;
- economic law, public law, constitutional law, communication and media;
- advanced methodological skills (research design, econometrics, analysis of large databases, survey methods)

8.1.2. The specialisation offered by the educational institution provides theoretical and practical knowledge appropriate to the field of study, developing personal skills and leading to specific competences linked to individual interests. The credit value of elective profession-specific studies is 30-60 credits.

9. Thesis

The aim of writing a thesis is to demonstrate the student's knowledge and expertise on a topic of his/her choice, in the collection, systematisation, analysis and processing of scientific data related to the chosen topic, in the discussion of the phenomenon or problem chosen as a topic, in creating hypotheses, in problem-solving, in the analysis of alternative hypotheses, in arguing and disproving counter-arguments, and in expressing one's ideas, views, positions and messages in a coherent, consistent and linguistically sound written form.

10. The type of the thesis

research-based thesis

11. Foreign language competence: ' -

12. Requirements for the issue of the final certificate

The University shall issue a final certificate to a student who has

- met the academic and examination requirements determined in the curriculum and
- obtained the required number of credits.

13. Conditions for admission to the final exam

Joint conditions for admission to the final exam:

- a) the student has obtained the final certificate,
- b) the student has submitted the thesis by the deadline,
- c) the thesis has been assessed and awarded a mark other than insufficient by the deadline,
- d) the student has applied for the final exam by the deadline,
- e) the student owes no overdue debt owed to the University in the given programme,
- f) the student has accounted for the assets of the University (e.g. books, sports equipment, etc. borrowed).

A student who has not fulfilled any of the conditions in paragraphs a) - f) may not be admitted to the final exam.

14. The parts of the final exam

A final exam comprises the defence of the thesis and a written comprehensive examination.

In the comprehensive examination, students are given a comprehensive question from a core subject of each of the three related disciplines and from the specialisation, through which they will have to demonstrate that they are capable of linking the different disciplines in their thinking. During the thesis defence, students present the findings of their thesis, respond to assessments and answer the questions asked by the committee.

Subjects of the comprehensive examination:

Moral and Political Philosophy,

Comparative Politics

Political Decision-making,

Comparative Political Economy;

Interdisciplinary Economics I-II;

And depending on the specialization:

Ethics

Theories of Democracy and Leadership

Global Political Economy

Topics from Modern Economic Theory

A magyar politikai rendszer intézményei, szereplői, működése

Economy and Society

15. Final examination result

The result of the final examination, that is, the grade awarded for the final examination, is the arithmetic average of the grades received for the parts specified in paragraphs (a), (b) and (c), rounded to two decimal places.

- a) the grade for the thesis awarded by the referee(s) on a five-grade scale, in the case of more than one referees, the average of the grades given by the referees rounded to two decimal places and
- b) the grade received for defending the thesis and for answering the questions related to the thesis, graded on a five-grade scale, as well as
- c) the grade received for the comprehensive examination on a five-scale grade (if it consists of a written and oral part, the average of the two grades rounded to two decimal places) with double weight.

16. Components of the diploma grade, method of calculation

the result of the diploma shall be constituted of the arithmetic average of the following items, rounded to two decimal places:

- a) the credit-weighted (arithmetic) average of grades received in compulsory and compulsory elective subjects in the amount stipulated in the curriculum (if the student took more compulsory elective subjects than required, then of all completed subjects) and
- b) the result (grade) of the final examination.

17. Conditions for issuing a diploma

The issuing of a diploma attesting to the completion of higher education studies is subject to the successful completion of the final exam.

18. Specialization selection rules

Students can choose a specialisation at the end of semester 3. Students rank their choices in order of preference. The criteria and rule for ranking students in case of oversubscription is based on students' weighted average academic performance of the studies completed in the first and second semester.

Minimum requirements for admission to the specialisation: completion of Survey of Research Methodology és Social Research Methods: Quantitative Data Analysis

Methods of assessment: ex-exam (exam at the end of the semester, but other forms of assessment are possible during the semester), pg- grade based on the practical assignments given during the course of the semester, a=signature, ce- Comprehensive examination

Physical education

Physical education is a criterion subject, the condition for obtaining a diploma is the completion of two semesters. The two semesters of physical education can be completed in 4 semesters from the start of studies. Students who have fulfilled the criterion can only take the subject in the form of reimbursement for a fee.

Foreign language

For more information on language instruction and language requirements, please visit the following link:<https://www.uni-corvinus.hu/post/hir/important-information-on-the-compulsory-language->

Courses taken in German all have equivalent courses in English.

¹ The following courses can also be completed in German:
[Global Sustainability Challenges - Globale Herausforderungen der Nachhaltigkeit](#)

Curriculum

It is recommended to include the subjects in the schedule according to the sample curriculum. The student may deviate from this, taking into account:

1. the pre-study order,
2. semester of announcing subjects
3. completion of an average of 30 credits per semester
4. in addition to the compulsory subjects, students may take elective subjects from the offer of elective subjects (see Neptun) as well as foreign languages.
