Exam start ▾

Finish

+ Add more interval

Here you will only see those subjects from which you can choose to fulfil the credit requirement specified in the Credit recognition decision. If you do not find a subject on the list that is equivalent to the required number of credits, you should enrol in two courses, or a single course with a higher credit value. If necessary, you can also search by language. Once you have made your selection, you should proceed in the same way as when enrolling on standard modules.
