**Fall/Spring:** FALL

**Language:** ENGLISH

**Prerequisites:** MACRO- AND MICROECONOMICS

**Course type:** ELECTIVE

**Department:** [Világgazdasági Intézet](#)

**Course leader:** [Dr. Magas Antal István](#)

**Course description:** This course provides an introduction to international financial markets and to the management of the special risks arising from international transactions. The basic thrust of this course is to provide a conceptual framework within which the essential financial decisions of the multinational firm can be analyzed. The approach is to treat international financial management as a natural and logical extension of the principles learned in the foundations course in financial management. Thus, it builds on and extends the valuation framework provided by domestic corporate finance to account for dimensions unique to international finance. The main text, Madura-Fox: Multinational Financial Management, South Western Cengage learning focuses on decision making in an international context. Analytical techniques developed help to translate the often-vague rules of thumb used by international financial executives into specific decision criteria. The book offers a variety of real-life examples, both numerical and institutional, that demonstrate the use of financial analysis and reasoning in solving international financial problems. Examples scattered throughout the text show students the value of examining decision problems with the aid of a solid theoretical foundation. Therefore, seemingly disparate facts and events can be interpreted as specific manifestations of more general financial principles.

**Course requirements during the semester:** IN CLASS ASSIGNMENTS AS DESCRIBED IN SYLLABUS AND BRIEFUNGS

**Examination requirements:** SELECTED CHAPTERS OF MAIN TEXT.  
MADURA-FOX: INT' L FIN. MANAGEMENT ,CENGAGE LEARNING , 2ND EDITION
